A Simple, Easy to Use System

VIDIZMO Digital Asset Management Software provides easy to use a simple portal to upload, store, catalog, search, find, access and share digital assets from any browser, any device anywhere and anytime. VIDIZMO DAM key features include:

- > Fully branded portal that reflects corporate branding
- > Integrates with corporate intranet and IT systems to provide single sign-on and content access rights management
- > Store photo, audio, documents, video and other creative files
- > Create Collection combining any type of assets together

Single Source of All Media

VIDIZMO provides each department a centralized location to store, catalog, index, search and find pictures, videos, and other collateral, and make them available for users across the world. VIDIZMO's Digital Asset Management helps teams find the most up-to-date digital assets and collaborate more efficiently with colleagues as well as external stakeholders.

Increase Productivity

We know that working with digital files has become the standard for enterprise operations. That's why VIDIZMO simplifies everyday processes such as searching for specific images, establishing copyrights and sharing large files, enabling you to save time and hassle when working with media.

Safely Manage Your Files

With Enterprise Single Sign-On, user, and group level access control, VIDIZMO provides secure access to your files. VIDIZMO's Digital Asset Management keeps you in full control of your files even after they have been sent out. Users can revoke access to collections to prevent unauthorized distribution of media files.

Designed for Enterprises

As employees increasingly expect to learn and connect via video, companies large and small face the challenges of effectively deploying a holistic video strategy that is secure, reliable, and offers an engaging user experience. VIDIZMO offers a comprehensive enterprise video streaming platform that combines all streaming video use cases required by modern businesses, including collaboration, training and learning, knowledge sharing, webcasting, marketing, and more – all in a single solution that can be accessed anytime, anywhere, on any device.

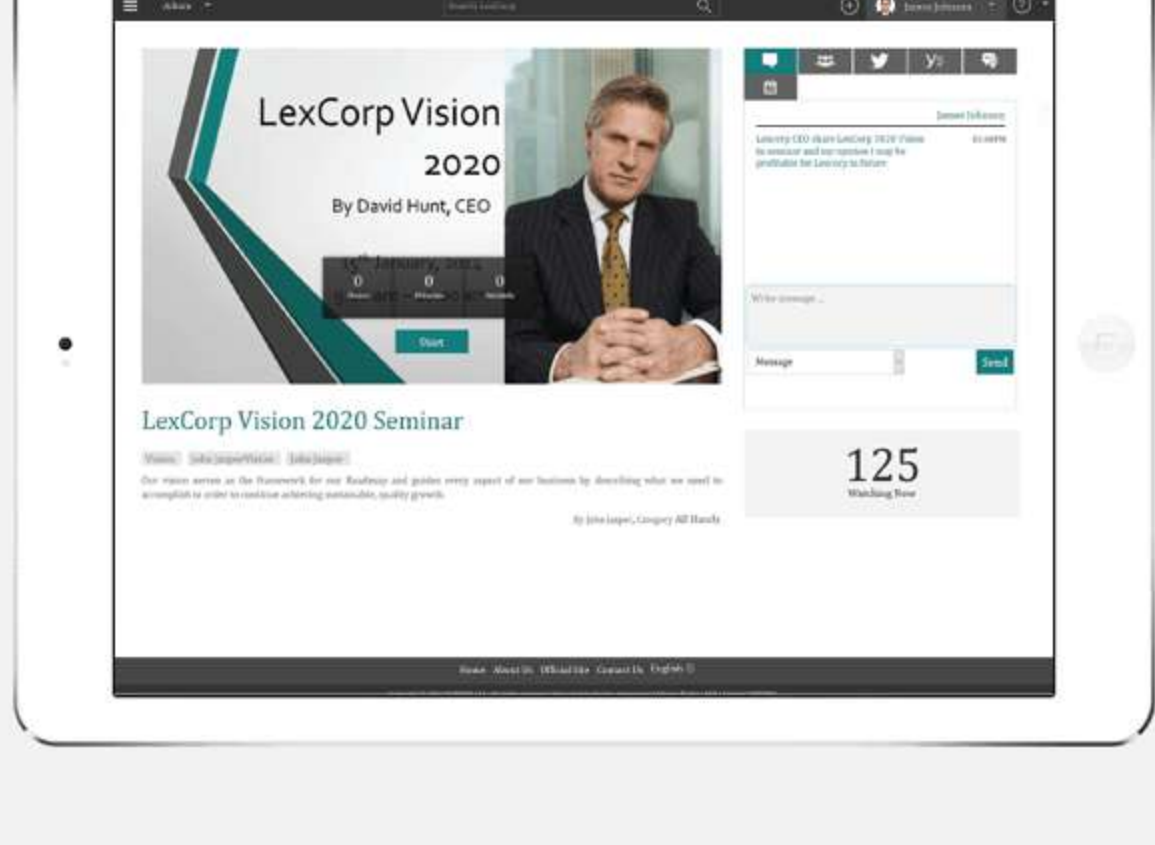

Enterprise Network-Friendly Video Streaming

Increasing video use across corporations poses concern regarding enterprise network's ability to stream video in bandwidth-challenged networks. To ensure optimal delivery of live or on-demand video to all devices and in all bandwidth conditions, VIDIZMO uses a combination of Adaptive Bitrate Streaming, Multicasting, VIDIZMO's Enterprise CDN built on Edge Caching Software, as well as other WAN optimization technologies from companies such as Cisco or Riverbed, among others.

Live Streaming Webcast

- > High Quality Webcast
- > Reliable Streaming Support
- > Enterprise Network-Friendly Streaming
- > Record & Archive for On-Demand Viewing

EnterpriseTube Use Cases

Corporate Communication

Deliver message more effectively across your organization. From town halls and executive messaging to live streamed events, ensure high quality, reliable playback for viewers, and powerful, easy-to-use tools for producers.

Training & Learning

Train more employees faster and more cost effectively. From reducing training and travel costs, to reusing video content and providing searchable training media, video improves learning results and provides better ROI on content.

Media & Entertainment

VIDIZMO provides enterprises with complete video management features such as ability to capture, upload, host, manage, publish, encode and stream live & on-demand interactive video presentations.

Education

VIDIZMO Lecture Capture is a flexible and innovative solution to schedule and record live classrooms where recorded lectures are automatically published in your Learning Management System (LMS) for on-demand viewing.

Government

VIDIZMO's video streaming platform provides government agencies, staff & contractors the ability to plan, produce and deliver interactive videos, as well as enriched scalable webinars & webcasts to a scalable audience. Live webinars are also automatically recorded for on-demand access.

Healthcare

VIDIZMO Health Academy is a new approach to improve healthcare by providing hospitals, agencies, professionals, and patients quick and easy access to live and on-demand videos for training, prescriptions, and self-care information.

Microsoft Azure & Azure Government Brings Ultimate Security & Compliance to Enterprise Content Management & Streaming Video

Microsoft Azure and Microsoft Azure Government provide ultimate security, compliance, cost efficiency and scalability of the commercial and government clouds. You have a choice of installing VIDIZMO in your own Microsoft Azure or Azure Government Subscription or use VIDIZMO's shared Azure (cloud) model. For government customers, Microsoft Azure Government offers physical and logical network-isolated instance of Azure Dedicated to US government with all data, applications, and hardware residing in the continental United States, with a broad range of compliance certifications critical to US government. Microsoft data centers are also located more than 500 miles apart, providing true geographic redundancy and efficient data recovery.

Ingest media from multiple sources, play anywhere

Integrate your branded EnterpriseTube portal with existing LMS, CRM, SharePoint, corporate website, and more

Cost Effective
Best of both Worlds

Completely Secure
Full IT Control

100% in-the-Cloud, 100% On-Premises or Hybrid Models

VIDIZMO can be flexibly installed in the deployment model of your choice. With a 100% cloud deployment, VIDIZMO offers zero start-up time, high scalability, and cost savings. VIDIZMO products also integrate seamlessly with enterprise single sign-on using SAML-P, ADFS, Azure AD as well as existing enterprise applications such as other content management systems, learning management systems, among others to provide a hybrid environment. Customers not ready for cloud have the option to choose 100% on-premises installation, which typically takes a week to go live.

Achieve Efficiency and Scalability

Achieve IT and business cost efficiencies using VIDIZMO's flexible deployment options for on-premises and Microsoft Azure Cloud to deliver live or on-demand video streaming solutions to hundreds of thousands of viewers within hours or few days.

Drive greater IT efficiency

Scale Dynamically

Reduce time to solution

Ensure Compliance

VIDIZMO Artificial Intelligence Solutions

Bolstering business potential and solving business challenges with the power of AI.

Why Use AI Video Solutions

Automation Efficiency . Workforce Productivity . Measurable ROI & Profitability
Innovation & Differentiation . Market Competitiveness

The increasing volume of enterprise video and rich data requiring efficient processing and analysis has far outstripped organizational capability to monitor and manage the data with limited resources. In the data-driven age of digital ubiquity, the growth of massive unstructured data for manual analysis, tagging and response has become a significant pain many industries are finding humanly impractical to resolve. As a result, business leaders across all industries are now turning to innovative artificial intelligence solutions to resolve business challenges while driving tangible benefits for improved efficiency, workforce productivity, cost savings and market competitiveness.

How can we help you?

With AI poised to transform business potential, there is an immense opportunity for organizations to harness the massive innovations of a diverse set of AI technologies like smart vision, speech, language, character, image and facial recognition within video and other rich media. A game changer for industries ranging from customer-facing businesses to data handling firms, retail, and healthcare (to name a few), AI offers profound shifts in efficiency by automating routine administrative tasks and manual processes to increase workforce productivity in core business areas – allowing for a more significant human input in strategic business functions thereby increasing business profitability. With deep learning, artificial intelligence can be self-learning, i.e. it learns from experiences to alter and improve processes and behaviors based on the learnings overtime.

Solving business challenges with the power of AI

Vision

Exploit video and image data with smart vision solutions for AI-enabled object recognition, facial recognition, character recognition, and content moderation.

[Learn More](#)

Speech

Achieve market competitiveness with innovative speech recognition and voice speaker AI solutions for enhanced productivity and higher content accessibility for all.

[Learn More](#)

Language

Break down language barriers for a globalized workplace and tap into global consumer markets with powerful multilingual translation in AI language solutions.

[Learn More](#)

Search

Consolidate and classify your videos and rich media with a highly categorized taxonomy, tagging, search and knowledge extraction via AI-powered content search.
